PROFESSIONAL SUMMARY

Highly driven cybersecurity enthusiast with practical knowledge in **network security, vulnerability assessment**, and modern web application security aligned with **OWASP principles**. Experienced in frontend development and UI/UX design, with a proven ability to build secure, innovative software solutions, including Web **applications**. Known for strong analytical thinking, rapid learning, and a future-focused mindset aimed at solving real-world security and software challenges.

CORE TECHNICAL COMPETENCIES

Cybersecurity & Networking - Foundational Network Security, Web Application Security Principles

Tools: Wireshark, Nmap, Burp Suite

Development & Tools - HTML, CSS, JavaScript ,Python , Git / Version Control, Software Design

UI/UX & Design - Figma (Wireframing), Adobe Photoshop, User Flow Design & Accessibility,Design Systems & Interaction Design

Soft Skills - Team Leadership, Quick Learning, Strong Problem-Solving , Adaptive & Forward-Thinking

ACADEMICEN PROJECTS

1. Blood Donation App (Android / Web)

- ➔ Developed a full-stack software platform featuring a secure Login/Registration system and a live donor availability module.
- ➔ Integrated geo-location APIs to enable real-time, location-based donor search, significantly improving emergency matching efficiency.

2. Blue Carbon Monitoring System (Blockchain POC)

- ➔ Designed a prototype application to secure environmental datasets using **blockchain concepts** and an immutable ledger to prevent data tampering.
- ➔ Constructed a web dashboard for data review and **Smart Contract-based verification workflow**.

3. Next-Farming Agent (AI-Based System)

- ➔ Implemented a software system that integrates a **Weather API** and delivers guidance via a chatbot-style digital assistant.
- ➔ Developed the simple web UI for real-time data display and access to the ML-based crop recommendation model.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering (Cyber Security)

J.J. College of Engineering and Technology, Tiruchirappalli

Affiliation: Anna University, Chennai

CGPA: 7.94 | 2028

Strengths - Technical Curiosity, Strong Problem-Solving, Detail-Oriented, Adaptable, Professional Communication.

LANGUAGES PROFICIENCY & STRENGTHS

Tamil - Native

English - Fluent

Arabic - Basic

Strengths - Technical Curiosity, Strong Problem-Solving, Detail-Oriented, Adaptable, Professional Communication

INTERNSHIP EXPERIENCE

Frontend Developer & UI/UX Intern — Securix Service (Startup)

Duration: 2025– Till Date

- ➔ Contributed to the front-end development and UI/UX design cycles for live startup projects.
- ➔ Designed UI wireframes and mockups using Figma, translating prototypes into functional, responsive web pages (HTML/CSS/JS).
- ➔ Enhanced user journeys, navigation, and accessibility, supporting continuous product improvements.
- ➔ Gained experience collaborating in a fast-paced development environment and optimizing interface performance.

HACKTHON COMPETITION EXPERIENCE

Bharatiya Antariksh Hackathon 2025

- ➔ Submitted an innovative solution for a national-level space and technology innovation hackathon.
- ➔ Demonstrated creativity, curiosity, and strong problem-solving mindset toward real-world space challenges.
- ➔ Recognized for contributing to India's space innovation journey.

National Level Hackathon – SRM TRP Engineering College (24-Hour Event)

- ➔ Participated in a 24-hour national hackathon focused on software and app development.
- ➔ Showcased practical skills, creativity, and commitment in addressing real-world technical problems.
- ➔ Collaborated effectively within a team environment under time-critical conditions.

Adobe India Hackathon – 2025

- ➔ Applied coding and logical reasoning to solve problem statements under evaluation conditions.
- ➔ Demonstrated strong aptitude in programming fundamentals and technical analysis.

CERTIFICATIONS

Social Engineering & Ethical Hacking 101 at CappricioSec University

- ➔ Built strong fundamentals in social engineering, phishing vectors, human-layer security, and prevention strategies.
- ➔ Performed hands-on SET (Social Engineering Toolkit) simulations, keylogger development basics, and real-world attack-defense scenarios.

Linux & Web Bug Bounty Bootcamp at CappricioSec University

- ➔ Trained in Linux command-line operations, automation, and security-driven workflows.
- ➔ Practiced BurpSuite, web reconnaissance, vulnerability identification, injection attacks, SSRF exploitation, and structured bug-bounty methodologies.

ACHIEVEMENTS

- ➔ **Student Membership – ACM Chapter**
J.J. College of Engineering & Technology
Recognized as an active student member contributing to academic and technical community initiatives.
- ➔ **Third Prize (National Level Technical Symposium):** Secured **Third Prize in Technothirst'25** (A.V.C. College of Engineering, March 2025) for presenting an innovative paper titled, "Blood Donation App: An Innovation Solution to Address Blood Shortages."
- ➔ **National Level Technical Presentation:** Recognized as a **Runner** for the **National Science Day 2025 - Technical Presentation** at J.J. College of Engineering and Technology (February 2025), demonstrating successful completion and active participation.

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
